

INSTALLATION INSTRUCTIONS FOR DEVON COTTAGE RETRACTABLE CLOTHES LINE POST TO POST

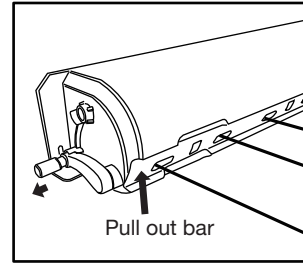

DEVON COTTAGE

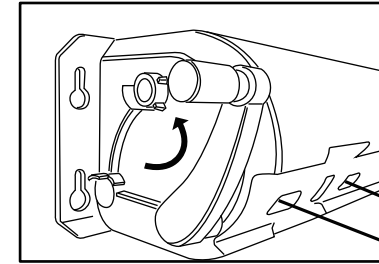

INSTALLATION INSTRUCTIONS

FOR 6 LINE - 42 METRE RETRACTABLE CLOTHES LINE

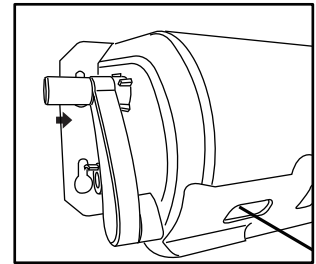

WALL TO WALL / WALL TO POST / POST TO POST

1. Hook lines on to "Receiving Bracket".
Unlock tensioning lever by pulling lever handle out.

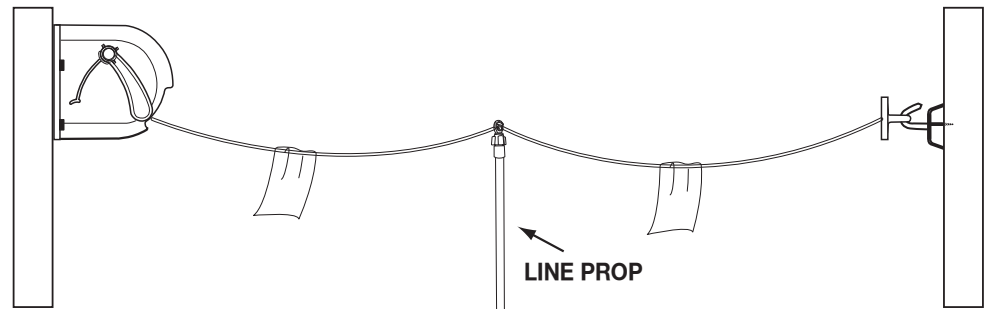

2. Make sure all lines are taut and not lying slack before winding the tension lever in the anti-clockwise direction.

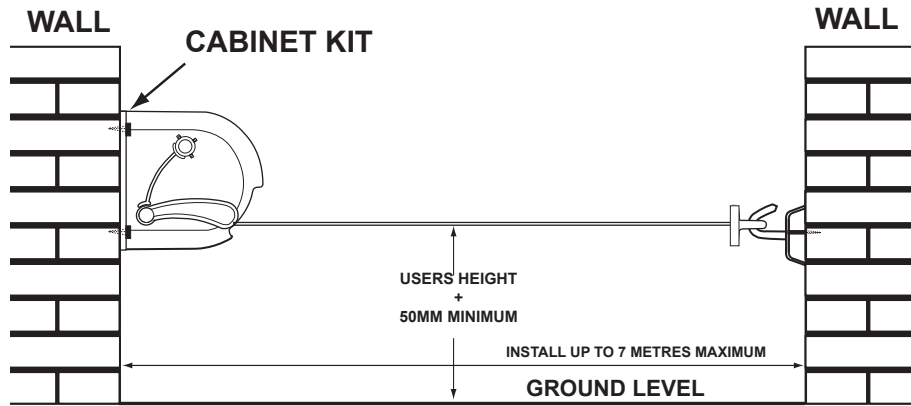

3. Lock tension lever by pushing the handle into the slot on the cabinet.

NOTE: WHEN TENSIONING INDIVIDUAL LINES (Not using all available lines)

1. Before winding the "Tension Lever", use the "Pull-out Bar" to hold the unused lines out from the cabinet approximately 50mm. This is to help pull the unused line back in to the cabinet when winding the tensioning lever on.
2. To support the line when fully extended you may need to use a 'Line Prop' (not included) to help with line sag when hanging heavy loads.
3. We recommend to evenly distribute heavy loads across all available lines.
