

BUILD YOUR OWN PULL BACK RACE CAR

MATERIALS:

1 Bottom Panel		1 Spoiler	
1 Car Body		1 Front wheel assembly	
1 Hood		1 Rear wheel and motor assembly	
1 Cab		6 Short Nails	
		2 Long Nails	

FINAL:

- 1** Attach the spoiler to the car body using 2 x short nails.

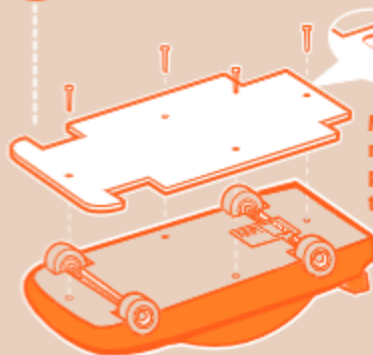

- 2** Attach the cab to the car body using 2 x long nails.

- 3** Place the front and rear wheel assemblies in the bottom of the car body assembly as shown.

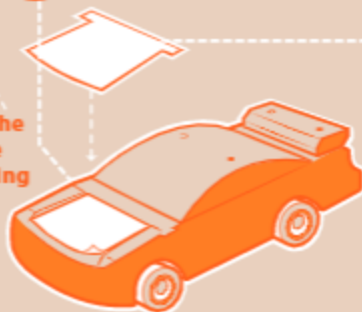

- 4** Attach the bottom panel to the car body using 4 x short nails.

Make sure the notch in the panel is facing the motor.

- 5** Apply the engine sticker to the front of the car.

- 6** Place the hood over the engine sticker and apply the windshield/hood sticker to secure the hood. Apply remaining stickers to complete your car.

Pull car back two to three times to power the motor! Let it go and watch your car zoom across the floor!

CAUTION: KIT contains components with functional sharp points. Adult supervision required. Please dispose of any components if they become damaged after assembly. Use safety goggles at all times. Small parts: not suitable for children under three years.
