

# BUILD YOUR OWN COIN BANK

## MATERIALS:

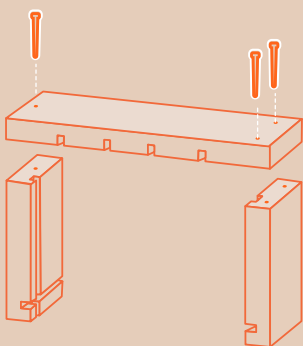

- |                    |                   |
|--------------------|-------------------|
| 1 Bottom Panel     | 1 Lid             |
| 1 Right Side Panel | 4 Wooden Dividers |
| 1 Left Side Panel  | 1 Window          |
| 1 Back Panel       | 11 Nails          |

## FINAL:

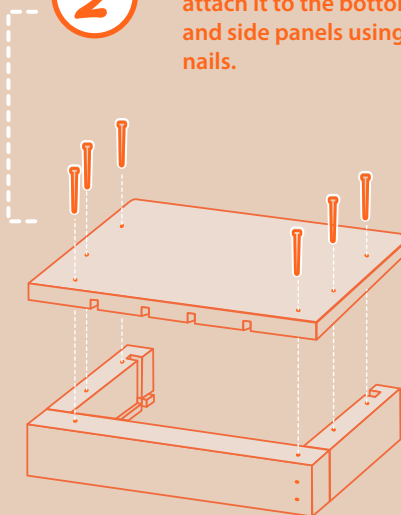

1

Locate the bottom panel and begin three nails in the pre-drilled holes. Matching the nail holes, attach the bottom panel to the left and right side panels. Make sure all the grooves line up correctly and face inward.

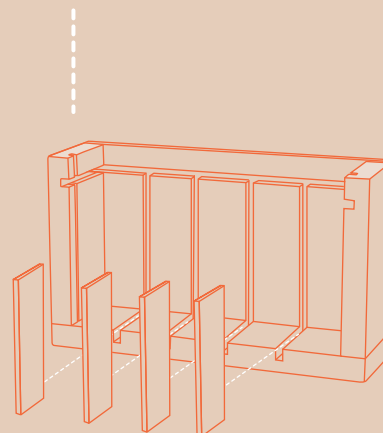

2

Locate the back panel and attach it to the bottom and side panels using six nails.

3

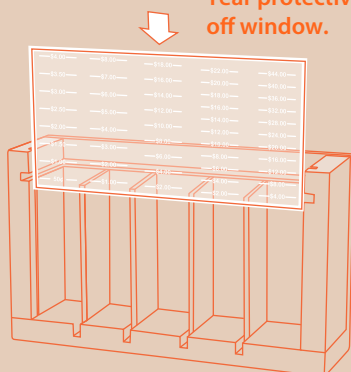

Slide the four wooden dividers in place.

4

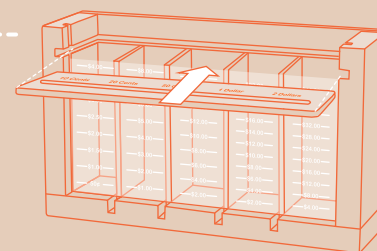

Slide the window in the front groove.

Tear protective film off window.

5

Slide the lid in the upper groove and you're ready to save with your new coin bank!

**CAUTION:** Kit contains components with functional sharp points. Adult supervision required. Please dispose of any components if they become damaged after assembly. Use safety goggles at all times. Small parts: not suitable for children under three years.
